

# Bjork, Notget VR

Once you tell out of love  
Our love couldn't carry you  
And I didn't even notice  
For our love kept me safe from death  
You doubted the light  
And the shelter it can give  
Dor in love we're immortal  
Eternal and safe from death

If I regret us  
I'm denying my soul to grow  
Don't remove my pain  
It's my chance to heal;

We carry the same wounds  
But have different cures  
Similar injuries  
But opposite remedies

After our love ended  
Your arms don't carry me  
Without love I feel the abyss  
Understand you fear of death

I will not forget this "Notget"  
Will you not regret having love let go?

After our love ended  
Your spirit entered me  
Now we're the guardians  
We keep her safe from death

Love will keep all of us safe from death /3x  
Safe  
From!  
Death!
