

Black Francis, Seven Fingers

I was born with seven fingers and seven toes
In my dark face sadness always shows
And my hair is striped with black and red and gold
And I'll die before I get me very old

But tonight I'll be with you
And in the morning when we're through
Please know that you have helped with with my pain

I met a girl who lived beneath the seas
She showed me how to call her on the breeze
I close my eyes and she comes lightening speed
To help this poor boy born of double seed

But tonight I'll be with you
And in the morning when we're through
Please know that you have helped with with my pain

I turn into a monster when I fight
Death is on my left and on my right
Friends and enemies are all the same
So stay away if I call out your name

But tonight I'll be with you
And in the morning when we're through
Please know that you have helped with with my pain
I was born with seven fingers and seven toes
