

Black Knights, Punishment

Artist: Black Knights f/ Northstar

Album: RZA presents Wu-Tang Killa Beez: The Swarm, Vol. 1

Song: Punishment

Typed by: Tha Masta, Cno Evil

[sample from the movie "The Swarm"]

Look what I do for a livin is not important

What is important, critical

Is that there are probably other invadin swarms

And what these bees did here

They could do again all over the southwest

And ultimately all over the country

[Holocaust]

Wu-Tang

Holocaust, punishment

Yo, yo, West Coast Killa Beez

yo, yo, on The Swarm

Yo, yo, yo, yo

Holocaust, Holocaust

yo, yo, yo, yo, yo

From the Hells of the Pacific I bring fury and anger

Stabbin devils in the chest with a rusty pirate ship anchor

Blood and sand we command and conquer, wast the plants

Then expand the regions undiscovered by modern man

Body counts increase by thousands by the hour

The sniper gone berserk blastin shots from the water tower

Absorbin energy from the sun, MC's run

My brain burst like to blow chunks outta your lungs

Blood on the pavement, crews gaze in amazement

I was doing that to niggaz who test me on the slave ship

We sell tapes and stage jail breaks wit past cellmates

Murder you in Hell's Gate, dare the bitches to yell rape

Ya pale faced against hollow points, I swallow joints

With romantic charisma that'll make your momma moist

My voice ensemble of bullets rip through your squadron

Circulate the planets, move back, you better dodge 'em

Or get opened up like a margin, brutal sargeant

Crisis should've warned you, I never missed a target

The livin weapon, war machine by Berry King

Relentless, remorseless, guiltless and unclean

Also the source of supreme of my team

Black Knight brigade peels caps like tangerines

Holocaust the hypnotic, psychotic, sub-atomic,

psychopathic, hyperactive, but attractive alcoholic

[Chorus x2: Crisis]

We bring nothin but punishment, Black Knights be runnin shit

have 'em runnin quick, uppercuts is what we coming with

Fuck the government, I grab the mic, that's when the thunder hits

Never love a bitch, rhymes echo throughout the dungeon pits

[Crisis]

Echo throughout the dungeon pits

[Christbearer]

Somethin for my culture, a state of harmony

The way of life that best suits me

I sincerely love Allah's Mathematics

Freedom and Rah, The Abbott, I rest within the square

Which is 4 times 90, while niggaz trues dare

The dominant intelligence, 99 elements for offspring celibate

Without knowledge life's irrelevant

I rode the benevolent Wu-Tang elements

[Doc Doom]

I bring lyrics to existence when I preach these powerful words
The priest of pandemonium, the War God has emerged
Above sea-level that's when thunder roars and lightning strike down
Atrocity, let it pour acid rain upon your compound
Chaotically, the Black Knights, we move robotically
Lyrically perform labotomy on your biology, a prodigy
A philosophy and theology, my ideologies'll break MC's down microscopically
The ghetto tropic be gettin more hectic by the second
Ghetto warfare, stray bullets hurl through window sections
And hit kids cause niggaz split wigs with no precautions
The War God raise 'em dead from they graves to haunt your conscious
With bloody screams, nightmares and bloody dreams
Of niggaz hauntin you through dark alleyways
Through myst and smoke screen, have you tweakin like a crack fiend
On high beam like Chris Steen, the lords reign supreme

[Chorus x2]

[Meko the Pharaoh]

I'm original mallot with metaphor comidic intelligence
I give a nigga all hardcore detention with his North Star invention
I must mention, I be creepin with the intention
to break free, from this evil mad society
Don't lie to me, I'm dope, I scope stuff I like to telescope
To provoke from being choked, cuz my ability is so live
And let me open up your insides and man hide
Not from confusion with this high energy I'm usin
Steady calculatin and movin, through the Abyss, where snakes hiss
And many men get pissed from followin false elements
From following false elements

[Chorus x2]

[Outro: Crisis]

Echo throughout the dungeon pits (echo)
