

Black Oak Arkansas, To Make Us What We Are

Work all day, party all night
tryin our best just to make things right
the stars are turnin and the world is
burnin
this fire's just a justice flight

Bring you to our hearts throw you to the
sky
all you do is wonder why
we'll try to reveal that magic seal
but always remember that we are real

The thickness of water
the wind of air
a pinch of fire and the potions there
to make our miracles
to make your happy smiles
to make light year miles
to make us what we are

To make you aware magic is there
or do you care what we can share
believe in spirits yes believe your near it
we're on earth to learn what love is worth

Feel the power a saint can feel
then remember that you are real
let's be together let's be as one
we'll shine as bright as any sun

The thickness of water
the wind of air
a pinch of fire and the potions there
to make our miracles
to make your happy smiles
to make light year miles
to make us what we are
