Black Sabbath, Danger Zone

Midnight, something don't feel right It's been too much, too far away from home Hard life, living the hard life I can't resist, I'm falling To the danger zone

All day long I'm pushed and shoved I just can't get enough In the danger zone

Red light, don't stop for no red light You know I'm always trouble on my own Lonely, ever so lonely I've got too much time I'm heading for the danger zone

All day long I'm pushed and shoved I just can't get enough In the danger zone

I'm eager, eager to please I can't stand no more It's got me on my knees

Ain't gonna feel no hurt Ain't gonna feel no pain I got nothin' left to lose I ain't got no shame Don't try to stop me Just leave me on my own I'm gonna live or die In the danger zone

I'm living in the danger zone In the danger zone

Hard life, I'm living the hard life I'm gonna take a chance In the danger zone

Lonely, ever so lonely I'm gonna live or die In the danger zone

Midnight, can't wait until midnight Help me I'm falling to the danger zone
