

# Blackalicious, Automatique

(feat. Floetry)

[Floetry]

It's automatique-- now  
So here bring my speak-- style  
Show y'all how to freak-- star  
Is automatique-- now  
So automatique-- now  
The sound you gon' keep-- down  
Come listen and peep-- how  
It's automatique

[Gift of Gab]

It's automatic sporadic movements on the brake  
The moment's magic the last thing that I should do is think  
I burst the energy that hints that really it's no time  
At birth you start to think that after death back to no mind  
A rest that makes you new again now you embrace the planet  
And stand in all of all the thing you daily took for granted  
The trees are posin' all unique in form make this perfection  
The most important time is now tomorrow's a projection  
A co-creator if you only just believe in that  
Right here today inside is where I find my freedom at  
Is simple as a lyric from my soul to yours as felt  
I didn't write this I just let the pen move by itself  
It's ART-o-matic

[Hook]

[Natalie of Floetry]

So blessed we rest in a space over-standin'  
This breath's so unique we must trace where we landed  
Magnetizin' minor tracks is subliminal  
So fiend-in to the evidence is evident I'm bein' true  
True to the moment the channelin' the callin'  
True to the heartbeat the passion and the formin'  
This rollercoaster's the one I stood in line for  
Hands in the air these upside downs here are paid for  
Make this relevant and here what you gotta hear  
I'm recordin' all the secrets of my silent shed  
Don't think about it just absorb everything you taste  
If it set you free you gonna find the ways  
You're who you gonna be unless you choose otherwise  
If you let it flow the universe will empathize  
Check your programs they monitorin' your sanity  
Now close your eyes inside you find the clarity  
It's automatic!

[Hook]

[Floetry]

Free your body know this ought to be open  
Then lose control just let it happen then  
Live at it and set it  
Move again your clarity start to assume again  
I know this one twist will feel it in  
You think you don't know the engine (???)  
But it's so automatic  
So so so automatic

[Gift of Gab]

It's automative, beyond the common logic native  
Beyond the ball around my drama now I'm divin' waitin

So stop and wait this, now operate it on the wavelength  
A thought of way is presented by true laws of nature  
Across the nation a lost of patience is cost inflation  
So caught in waitin', and contemplatin' obligations  
Read up inaugurations politrations violatin  
And all the haters all up it cannot invadin'  
The honest tension, two orders sacred not created  
Good thought I made it!! I'm born beyond the constellations  
So concetratin', and follow man we all are awakin'  
It's automative, you gotta make it follow faith in  
Come on come on!

[Hook + adlibs]

THE CRAFT!
