

# Blackpool Lights, Unlucky

Just another wasted night You turn away  
Darkness turns to light Take the blame  
The sun won't hide You're all alone  
The loneliness behind your eyes It's something that  
To everyones surprise You can't escape from  
You turn away  
It's something that you can't escape from Chorus  
You're not the lucky one X2  
Sleep off the day  
Waste it away  
You're not the lucky one  
Your heart would do  
But you used that too  
You're not the lucky one

You can't remember names  
They all look the same  
These scribbled numbers  
Trophies on the nightstand show your age  
Who is left to blame  
Just you alone  
It's something that you can't escape from

Sleep off the day  
Waste it away  
You're not the lucky one  
Your heart would do  
But you used that too  
You're not the lucky one, the lucky one

This is your last chance  
Running from your past  
Take your final gasp  
Cause no one is listening  
Faking happiness  
Clean up your own mess  
Get it off your chest  
Before you're lost

This time you swore you'd change  
Nothing left to gain  
Your past still haunting  
You would do it all over again  
You do it all again
