

Blaq Audio, Black Electric

I watch the streets glow before me
And hear them promise a story
If only I'll listen

Oh, I
Watch the skyscrapers as they melt away
In the drops I can hear them say

This is the instant
Let the gravity lose it's grasp

We are rising
Up from this underground
And we are blinding
With black electric as we
Set this night alight

I heard the say the boy's missing
Heard they say he's been kising
The sparkles of the night

Oh, I
Heard they say that he turned the other way
Heard he's planning along with strays

Who in an instant
Let this decadence take it's grasp

We are rising
Up from this underground
And we are blinding
With black electric as we
Set this night alight

I heard the streetlights sigh
I set them them all to sleep again
I deny that it's goodbye
We'll dance another night

I heard the streetlights sigh
I set them them all to sleep again
I deny that it's goodbye
We'll dance another night

Who in an instant
Let this decadence take it's grasp

We are rising
Up from this underground
And we are blinding
With black electric as we
Set this night alight
