

Bleach, Race

Youve not seen the white smoke for years
It seems to me youve stripped out
Stripped out all your gears

You know it will whip you a bit
Dont know if you can handle it
But you can taste it, you taste the thrill
Come on come on just one more mile
You can make it if you will

[CHORUS]:

I want to race, I wish youd race
I want to race you there
Step on out and step on in
To a race that never ends

Drop it out you know it drags you down
Rather turn your head to see a blurry crown
But then youve been here before
Its sounding better, better more and more

[CHORUS]

This thing, the call
Decision based on knowing
Youve joined the race
And know its got you goin
Bloodstream is pumping
One hundred miles an hour
Youre set, to go
You know its now or not at all

Lets get it started
