

# Blink 182, Dreaming

I love every minute we spend together  
I think we will last forever  
your the one that keeps me alive  
your the one that makes me thrive

I come over every friday night  
all these months we havn't had a fight  
every day and night  
your the best thing in my life

I couldn't stand being apart from you  
the day I die is the day were through  
your always gonna make me smile  
whenever im depressed or in denial

your the one i've been searching for  
having sex on your front room floor  
those weeks you went away and played  
I so much missed being layed

when you said yes that morning  
the happiest day I was soaring  
this magic is going to last  
these days have flown by so fast

I couldnt stand being apart from you  
the day I die is the day were through  
your always gonna make me smile  
whenever im depressed or in denial
