

Blood on the dance floor, Fallen Star

We were so in love
We did all the drugs
Fell down in clubs
Our hearts just raised up
We kissed in the dark
In the back of your car
We cuddled in the park
You shine like Noahs ark
Pain inside
Crashes and glides
I can't decide
Your heart was my guide
It's been too long
You were my perfect drug
Now the world's all wrong
I hope you sing along
Wherever you are
Youll be my star
Near or far
You'll always be my one
Kiss me goodnight
You say its alright
This cant be goodbye
My heart just dies
Kiss me goodnight
You say its alright
This cant be goodbye
My heart just dies
Earth is dying
Kids are crying
The plans we made just rot away
Your angel wings
Will shine on me
Like the blood on the strings
My heart just falls and sings
You fall in front of me
As I'm castaway from sea
Ill be your dream machine
A life full of luxuries
Your life will flash
So make it last
Dont ever look back
Your life will fall of track
Like Jack and Sally
On top of Death Valley
Right below in Southern Cali
We lived out our grand finale
Wherever you are
You're still in my heart
Near or far
You'll always be my star
So kiss me goodnight
Say its alright
This cant be goodbye
My heart just dies
Earth is dying
Kids are crying
The plans we made just rot away
Wherever you are
You're still in my heart
Near or far
You'll always be my star
Like Jack and Sally
On top of Death Valley

Right below in Southern Cali
We lived out our grand finale
