

# Blood Or Whiskey, Take Me Along

And now the time has come for leaving  
And when you go I must go too  
I hope that when it matters most to me  
That it will mean as much to you  
You know that I didn't ask for trouble and that  
Never will I ask for more  
But I just long to hear you calling me  
As you come closer to my door  
Now the time has come for leaving and I know I'll be strong  
Won't you take me along won't you take me along  
Now the time has come for leaving and I know I'll be strong  
Won't you take me along won't you take along  
At night I dream that you're beside me  
But when I awake and you're not there  
I get so scared that you've abandoned me  
I wonder if you will still care  
I need a sign send me a signal  
When you're on your way I'm sure you'll know  
My fears are packed you'll find me waiting with  
A dream to chase and a will to go  
So with minds fixed on the future babe  
Take my hand and we'll take heart  
We'll find a way to make the journey babe  
But it can't end if it don't start
