

# Blues Traveler, Last Night I Dreamed

It's the part of the dream that leaves me when the sunlight hits my eyes  
It's the part of the dream that rolls me over and over as I sleep  
It's the part of the dream that leaves me wanting for the darkness  
It's the part of the dream I can't remember it at all

I dreamed about you last night  
I dreamed about you last night  
I dreamed about you last night  
Last night I dreamed  
Last night last night

Something about a big jet plane moving fast off into the sunset  
Maybe a mustang moving fast up to the sky  
More like a great big boat drifting off to nowhere  
I know that in the end you were waiting on the other side

I dreamed about you last night  
I dreamed about you last night  
I dreamed about you last night  
Last night I dreamed  
Last night last night

I can feel the dream long before it makes my mind  
I know the dream like the scent of the evening air  
I need the dream to keep me safe until the morning  
When I open my eyes you're there

I dreamed about you last night  
I dreamed about you last night  
I dreamed about you last night  
Last night I dreamed

I dreamed about you last night  
I dreamed about you last night  
I dreamed about you last night  
Last night I dreamed
