

Bobby Caldwell, Take Me, I'll Follow

Tired of feeling all by myself
Being so different
From everyone else
Somehow you knew
I needed your help
Be my friend forever
I never found
My star in the night
Feeling my dream was
Far from my sight
You came along and
I saw the light
We'll be friends forever

CHORUS:

I can't face the
Thought of you leaving
So take me along
I swear I'll be strong
(If/when) you take me
Wherever you go
I wanna learn the things
That you know
Now that you
Made me believe
I want you to take me
'Cause I long to be able
To see the things
That you see
know that whatever you do
I'll follow you

Somebody must have
Sent you to me
What do I have
You could possibly need
All I can give is my guarantee
We'll be friends forever

Repeat chorus

Teach me more in
Each passing hour
By your side
I know I will cover
Is it true that
You have the power
To capture this moment in time

Take me wherever you go
I wanna learn the things
That you know
Now that you made me believe
I want you to take me
'Cause I long to be able
To see the things
That you see
Know that
Whatever you do
I'll follow you
(Repeat)
