

# Bombay Bicycle Club, Diving (feat. Holly Humberstone)

Wake up, we gotta warm our lungs  
Sun will light up, it's all to come  
I got no words, I'll follow you  
We got your back, you're coming too

The weight is lifting off my mind  
And everyone is running wild  
The Earth has split beneath our toes  
And everybody knows

Roll the past away from me  
Run along and dip my feet  
Hold our breath and we can go down

Hope you see the best in me  
Diving under next to me  
Hold our breath and we can go down

Wonder how our lives could be  
Say it's warm, just promise me  
Hold our breath and we can go down

Hope you see the best in me  
Diving under next to me  
Hold our breath and we can go down

Load up your bags, we're gone for days  
We're gonna play the song we made  
We weave the sound and string along  
We leave the ground, we're floating on

The weight is lifting off my mind  
And everyone is running wild  
The Earth is soft beneath my toes  
And everyone around me knows
