Bon Jovi, Fear

I see you looking over your shoulder
Tell me who do you think's out there
You're reaching for your four leaf clover
But baby there ain't no luck down there
I swear that there's no heart in this city
It's here the slogan reads
"Do your time" everybody's doing
their sentence
It's just there ain't nobody here
Who knows just what's the crime
I watched my father live a lie here
I'd rather die than fade away
I read the rules
And yeah I know them

And yeah I know them Still you ain't ever gonna Make me play the game of

Fear

Fear

Fear

Fear

Running with the rats Through the city

Makes you feel like you're

A partner in crime

Girl once you won't stop to watch

That little girl did

Hey baby won't you stop and hear me

Just being here we're

breathing heart attacks

We can run and chase

The setting sun we can run

And we won't ever look back

Take my hand I know we'll make it

I'll let nothing slow us down

I know you want to curse

This place but there's only

One thing that's stopping us now

Fear fear fear

Of a new thing

Fear fear fear

Of the brass ring

You ain't one for taking chances

You work and live and breathe that 9 to 5

Still that's what you call living

That's surviving to me

And surviving is living to die in

Fear
