(Look Up) The Sky Is Falling
Another winter day,
Another grey reminder that what used to be has gone away.
It's really hard to say
How long we have to live with our insanity.
We have to pay for all we use.
We never think before we light the fuse.

(Chorus) Look up, look up, look up,
          The sky is falling!
          Look up, there's something that you have to do.
          Before you try to go outside, to take in the view,
          Look up because the sky could fall on you!

 Another restless night,
The wind is howling through the empty streets outside.
We have to hide.
We dare not go outside,
We must not walk into the darkness of the night.
We have to pay for all we use.
We never think before we light the fuse.

(Chorus)

We have to pay for all we use.
We never think before we light the fuse.

(Chorus, repeat)
