

BrainStorm, Love Song

Love song

This is not a love song
That's a song that fades away
Spring is loves playground
And I love this song every day

The sun rises over my mountain
I bath in it's light it's heat
But below the sparks bring fire
And world burns free

Do you
Do you feel empty
Like thousand dark nights

In the earth's pools I dive
In the water's rush I feel another
People are lonely
But I always breathe with my mother

Do you
Do you feel empty
Like thousand dark nights
(have) you burned
Too far
Do you feel me
Be set free

Earth, wind water and fire - in them I believe
Earth, wind water and fire - with them I will live
