

Brandy, The Definition

The Definition (definition)

Whoo-who

The definition

Real good

Dark Child

I dropped all that baggage

Let go of that habit

The pain you can have it

Now Im content with me

Im lovin this kid

And I gotta admit

Feels like the beginning

Now Im content with me

Its hard to explain it been through it, you name it

The heartache kept breaking

The shamed played that game

But I, couldnt seem to win

I started to think

Something was wrong with me

Till I was finally introduced to happy

I made the greatest discovery of mankind

You define the existence of love

And I found it in you searched my whole life through

So rare but so true

The definition of love is you

The definition baby is you

The definition baby you are

I traded that frown and bought me a brand new smile

Im wearing it proudly cuz now Im content with me

No longer uncertain Im sure of the verdict

Im free and love it and now Im content with me

Its hard to explain it been through it, you name it

The heartache kept breaking the shamed played that game

But I, couldnt seem to win

I started to think

Something was wrong with me

Till I was finally introduced to happy

I made the greatest discovery of mankind

You define the existence of love

And I found it in you searched my whole life through

So rare but so true

The definition of love is you

The definition baby is you

The definition baby you are

Cuz Ive been digging for years

Barely see pass the tears

Cuz I thought my heart had disappeared

But until you, came into my life

Made me a new

Showed me the truth

Yeah

I made the greatest discovery of mankind

You define the existence of love

And I found it in you searched my whole life through

So rare but so true

The definition of love is you

I made the greatest discovery of mankind

You define the existence of love

And I found it in you

Searched my whole life through

So rare but so true

The definition of love is you

The definition baby is you (3x)

The definition defined by you
