

Bravo All Stars, Children Of The World

This goes out to all the children
All over the world
This one's for the children
Children of the world

Come a little closer now
So you can see the children's eyes
There's no use in trying
When you're dealing with the dying
So let me have a talk with you
And hope that you believe it too
There's so many ways to help
Laughter you can bring

Come closer now
See the children's eyes
You just have to give them
A helping hand

With a little bit of love
And a little bit of time
You can help the children of the world
Just a little bit of love
And a little bit of hope
There're a lot of things to do
To help the children of the world

The children of the world

R'n'G is about to take control
The only thing you gotta do is set yourself free
We got to help each other, that's how it has to be
2-4 Fam. here to lend a helping hand

Come a little closer now
See it in their eyes
We've got to keep on trying
To stop the children crying

Come closer now
See the children's eyes
You just have to give them
A helping hand

With a little bit of love
And a little bit of time
You can help the children of the world
Just a little bit of love
And a little bit of hope
There're a lot of things to do
To help the children of the world

We just have to understand
They all need a helping hand
With a little bit of love
A little bit of love
Lot of things to do
Hope you know it too
We just want to give them a little hope

With a little bit of love
And a little bit of time
You can help the children of the world
Just a little bit of love

And a little bit of hope
There're a lot of things to do
To help the children of the world

With a little bit of love
And a little bit of time
You can help the children of the world
Just a little bit of love
And a little bit of hope
There're a lot of things to do
To help the children of the world

Children
Help the children of the world
