

Brody Dalle, Meet The Foetus / Oh The Joy

You have felt, you and I
You might need them
Perfect parasite, you might need them
You and I, dealing Meth
We'll never get it right

Shot through the heart, baby
I'm gonna love you forever
And it will take me all night
You know I'll love you forever

I pull it down from the sky
All the stars wash over you
Shot through the heart, baby
I'll always love you forever

Every night I burn holes in your eyes
LSD, I know I go in disguise
Organ mouse, silk blood spouse
Ex-sanguinate the fears

Shot through the heart, baby
I'm gonna love you forever
And it will take me all night
You know I'll love you forever

I pull it down from the sky
All the stars wash over you
Shot through the heart, baby
I'll always love you forever
