## Brooks & Dunn, Unloved

I know you know Just how it goes when it goes And how it feels To be lost and left alone on your own And what it's like To give all you got and have to stand and watch it As it walks away So everyone deserves a chance to live and learn From mistakes That we make and hearts that break and bridges burn Starting now From this moment on nothing's gonna go wrong Love is here to stay

You'll never be without You'll always have enough When you're in my arms You'll never go unloved As long as there is time And for all of it to come No matter where you go I want you to know You'll never be unloved

So in this life we lead Some things are guaranteed You can Count on the fact that hearts won't act responsibly Now and then Comes a love that's heaven sent and meant to be So baby look at me

[Chorus] [Chorus]
