

# Brother Firetribe, Spanish Eyes

Darkness fades away and the first rays hit the floor  
Sleep's been out of question, this road goes on and on  
It's been month now since the last time I heard you close the door  
It was right there in that sound  
That said you and me no more  
Getting straight down to the point with nothing left to say  
I coulda done things differently  
But my world got in the way

[refrain:]

All I just wanted was to make it somehow right  
Forever in these arms and hold on so tight  
So now you're gone and I've given up the fight  
But I still swear that I'd die for you  
And your Spanish eyes  
Baby your Spanish eyes mean the world to me  
Wheels just keep on rolling  
It's getting better all the time  
Thank God I keep on moving  
Always another city sign  
Strangers buzz around me  
Feels like sometimes I've lost the ball  
Soldiers of show business march alone after all  
But it gives me time now to forget  
What I thought was killing me  
My world is somewhere too far gone  
For your Spanish eyes to see

[refrain]

I'll try to live my life  
And try to stay alive  
This is how I say goodbye  
To your Spanish eyes  
I had to say goodbye  
For I believe was right  
This is how I say goodbye

[refrain]
