

Bruce Dickinson, Sonata (Immortal Beloved)

Bruce Dickinson prezentuje utwór "Sonata (Immortal Beloved)" z płyty "The Mandrake Project" (prezentacja)

Here in this dark forest
Where nothing will live
I see the frozen eyes
Maybe something... Can be heard...
Frozen raindrops hanging on the trees

Here in the dark forest
Where angels live And angels sleep
Herein my heart is raging again... Again

Save me now, save me now, save me now
Save me now, Save me from this pain...
Save me now, save me now...
Let me live again...

I walk into the Halls of ice and thorns
Decaying frozen walls
I blame myself I was not here...
For this king could have lost his crown...
But still is your heartbeat
Your breath hangs frozen in the air
Some poisoned enchantment...
Your beauty... It will not last...

You say save me now... Save me now...
Save me now... Save me now
Save me from this pain...
Save me now... Bring me back...
Save me now and help me live again

The king returned and all was silent...
The body of his frozen queen... Tragic
The acolytes around her...
Expressions of horror

Make me whole again...

Bring back my Queen...

Make me whole again

And free the ice queen now

Come back to me... Come back to me...

Save me now, save me now, save me now
Save me now, Save me from my grave...

Save me now... Save me now
Help me... Help me live again

He kissed her on the lips, and his tears
They melted stiff unyielding flesh...
As his lips touched
Her last frozen breath...
A strange light... Illumined her eyes...

And the shadow of the valley of death...

He kissed her on the lips, and his tears
They melted the stiff unyielding flesh...
As his lips touched

Her last frozen breath...
A strange light... Illumined her eyes...

And the shadow of
The valley of death approached...

And the king cried...
For I am damned what have I done

And the Ice Queen shrieked
As the angel of death appeared
Who pays the price he laughed

For love has brought you here
And love will tear you apart

For love has brought you here
And love will tear you apart

For love has brought you here
And love will tear you apart

For love has brought you here
And love will tear you apart

I'll take you back
Let me take you back
I will take you back
