

Buddy Holly, Come Back Baby

Come back baby - baby won't you come back
come back baby to me
now I know why all sad hearts cry
baby baby come to me

Ah well I cried all night ever since you left me
nothing has gone right - oh lonely old me

I say come back baby - baby won't you come back
come back baby to me
now you know I love you so
baby baby come to me

When you left me all alone to sing the blues
I waited by the phone to get good news

That you would come back baby - baby won't you come back
come back baby to me
now you know I love you so
baby baby come to me
wo, come back baby to me
