

Buddy Holly, Now We're One

Now we're one and I love you so
hold me - tight never let me go
make the feeling run up my spine
you know I'm yours and you are mine
now that we are married baby - we don't have to worry
now we're one

Now we're one and a-you're my bride
we don't have to run and hide
every time I want to hold your hand
I'm 'fraid someone won't understand
now that we are married baby - we don't have to worry
now we're one

Well, I wanna jump to the moon and yell out loud
I feel like I'm walking on an eighteenth cloud
we'll put all our fears and cares behind
ever since we heard the wedding bells chime
