## Budgie, All Night Patrol

Come on baby take me to your heart Just take a ride up in my car Oh, i'll just refuel before we start The day is night before we part What a perfect living, what a perfect day You think you've got no place to go And your daddy's kicked you on the road You need a lover not a foe So you just relax and then unload What a perfect living, what a perfect day So you think you're foolish playing hell All night petrol beats you with its smell You take a burning lamp and tell time Slumped upon the floor where we once fell What a perfect living, what a perfect day You want me no You let me go You won't say no
