

Burak Yeter, Low Lonely (feat. Harddope, Badscandal)

I said that I would never let you down
But there you were on the ground
Baby you know that I'll stick around
No need to worry now

If I could give you my life I would
Just believe it's gonna feel so good
Feel so good

I go low low low when you're low lonely
Covers overhead, I go underneath
I've been working hard just to set you free
I go low low low when you're low lonely

I go low low low when you're low lonely
Covers overhead, I go underneath
I've been working hard just to set you free
I go low low low when you're low lonely

I said that I would never let you down
But there you were on the ground
Baby you know that I'll stick around
No need to worry now

If I could give you my life I would
Just believe it's gonna feel so good
Feel so good

I go low low low when you're low lonely
Covers overhead, I go underneath
I've been working hard just to set you free
I go low low low when you're low lonely

I go low low low when you're low lonely
Covers overhead, I go underneath
I've been working hard just to set you free
I go low low low when you're low lonely

When you're low low lonely

I go low low low when you're low lonely
Covers overhead, I go underneath
I've been working hard just to set you free
I go low low low when you're low lonely

When you're low low lonely
When you're low low lonely
