

# Burning Heads, Globalize

tons of oil  
slickened sea  
you don't care  
cars can't see  
giants fall  
crashing down  
wipe your ass  
happy now?  
so it's gonna happen  
we're gonna break it down  
it's gonna happen  
we're gonna blow it into pieces  
disasters, pollution  
breathe that poison in the air  
dioxin in your soup  
suck it up, now you're hooked  
globalizing  
realizing  
optimising  
compromising  
look around at what's now left  
you've dug your grave now lie in it  
millions dying with you  
you know we're never gonna stop  
smash our heads against the wall  
keep it going  
keep it going keep on buying keep on working
