

Burning Heads, Globalize

tons of oil
slickened sea
you don't care
cars can't see
giants fall
crashing down
wipe your ass
happy now?
so it's gonna happen
we're gonna break it down
it's gonna happen
we're gonna blow it into pieces
disasters, pollution
breathe that poison in the air
dioxin in your soup
suck it up, now you're hooked
globalizing
realizing
optimising
compromising
look around at what's now left
you've dug your grave now lie in it
millions dying with you
you know we're never gonna stop
smash our heads against the wall
keep it going
keep it going keep on buying keep on working
