Camylio, high, high, high

I feel it in my blood
Darling when you hold me
I can feel the chemicals
You took the man I was
Burned away the broken parts
And left the beautiful

There ain't a feeling that I would trade For that little smirk when you say my name

You get me high, high, high
Oh with just your smile
My love
Oh my love
You get me high, high, high
When you're by my side
My love
Oh my love
You get me

High, high, high

Told mama you're the one She asked me when I knew And I said oh right from the jump You're the only love I want Cause all I ever crave Is you on days when we're apart

There ain't a feeling that I would trade For that little smirk when you say my name

You get me high, high, high Oh with just your smile My love Oh my love You get me high, high, high When you're by my side My love Oh my love You get me

High, high, high

You get me high, high, high Oh with just your smile My love Oh my love You get me
