Canaan, Mercury

Drink this mercury from my open hands for I'm the breathing shadow that keeps us alive

This grey sky turned to black so many times honey.....

So stay with me tonight hold my hands tonight For I'm the smiling ghost that binds our hearts together

Don't leave me tonight
For I have mercury that burns
Hold these hands of mine
Kiss these lips of mine
For I'm the mirror
that never lies

Stay with me tonight Die with me tonight The sky will turn to black for the very last time tonight honey....
