

Cappella, Come On Up And Dance

Come on up, come on up, come on up and dance
Come on up, come on up, come on up and dance
Come on up, come on up, come on up and dance
Come on up and dance

My desire is to set you on fire
Lift you up take you higher and higher
To ecstasy I want you to see
When you have fun you set yourself free
Climb with my rhyme and you will shine
Like a star 'cos that's what you are
Reach for your dreams they're not that far
Everything is possible, go for it
Do like me I score hit after hit
I wrote the music for you to use it
There's no way that you can refuse it
So wave your hands like you just don't care
The party it's out there let me hear you cheer
Funky that's the tune it makes sense
Here's your chance now come on and dance

Everybody come on up and dance
Everybody we can all be friends
Everybody get up on your feet
Everybody

My desire is to set you on fire
Lift you up take you higher and higher
Like a star 'cos that's what you are
Reach for your dreams they're not that far
So wave your hands like you just don't care
The party it's out there let me hear you cheer
Funky that's the tune it makes sense
Here's your chance now come on and dance

Everybody come on up and dance
Everybody we can all be friends
Everybody get up on your feet
Everybody
