

# Carl Smith, It's A Lovely Lovely World

Mother nature's opened up the door to lots of things I never saw before  
It's a lovely lovely world since I met you  
Never did see everything looking so nice I just learned the meaning of paradise  
It's a lovely lovely world since I met you  
Now the sun shines brighter and the sky's a little bit bluer  
And my little old rattle trap Ford coupe even seems a little bit newer  
Well my guitar stays a little better in tune  
The stars shine brighter there's honey on the moon  
It's a lovely lovely world since I met you  
[ steel - guitar ]  
Ever since you cuddled in my embrace I've had more fate in the human race  
It's a lovely lovely world since I met you  
Now I don't mind working or slaving all day  
Cause I know tonight there'll be love to pay  
It's a lovely lovely world since I met you  
Everything seems natural and right since the day I found you  
Everything looks rosy and shiny bright in the dreams I'm building around you  
Used to think that miracles would never come true  
But now I'm happy cause I know they do  
It's a lovely lovely world since I met you
