

Carly Rae Jepsen, Anything To Be With You

Never over, never over
Never over, never, never over

Anything you wanna do
I really wanna do with you
I can be friends with your friends, your friends
Anything to be with you

Anything you wanna feel
I really wanna feel with you
I can be down when you're down, you're down
Anything to be with you

I feel like I know love's
Second chance, almost slipped away
When it comes to me, boy
Falling for you is never over

Never, never over, never over
Never over, never, never over
Never, never over, never over
Never over, never, never over

Anywhere you wanna go
I really wanna roll with you
We can make love in your town, my town
Anything to be with you
Anything, anything
Anything, anything

And if you wanna dance
I really wanna groove with you
I can get down when you're down, you're down
Anything to be with you
Anything, anything
Anything, anything

I feel like I know love's
Second chance, almost slipped away
When it comes to me, boy
Falling for you is never over

Never, never over, never over
Never over, never, never over
Never, never over, never over
Never over, never, never over

Never, never over, never over
Never over, never, never over
Never, never over, never over
Never over, never, never over

Appetite for stars tonight
And you're the reason, you're the reason
There's something bright in lovers' eyes
And you're the reason, you're the reason
And you're the reason

If anything you wanna do
I really wanna do with you
I can be friends with your friends, your friends
Anything to be with you

Anything you wanna feel

I really wanna feel with you
Anything you wanna do
Anything to be with you
