

# Carly Rae Jepsen, Shooting Star

I might sleep with you tonight  
If you wanna know why  
Just because summertime and you look fine  
Press my back against the door  
Of the refrigerator when the heatwave comes  
Ice can't melt how hot we felt

But I still believe in my New York City  
Lots to do and the boys so pretty  
Can't believe I've been gone so long  
We can turn it on

Just sweat  
All my fears away  
Dancing through the dark  
Saw your angel face  
Caught my shooting star

I got you now, I'm Scorpio  
It's physical, it's natural  
My spiritual, my animal  
Caught my shooting star

I got you now, I'm Scorpio  
It's physical, it's natural  
My spiritual, my animal  
Caught my shooting star

I believe  
There's a true connection  
With you and me

So I might sleep with you tonight  
If you wanna know why, just because  
I still believe in my New York City  
We could turn it on

Just sweat  
All my fears away  
Dancing through the dark  
Saw your angel face  
Caught my shooting star

I got you now, I'm Scorpio  
It's physical, it's natural  
My spiritual, my animal  
Caught my shooting star

I got you now, I'm Scorpio  
It's physical, it's natural  
My spiritual, my animal  
Caught my shooting star

Last chance  
You turn to me  
I'd like to let, let you get, get to know me  
Romance  
Walk down the street  
I'd like to let, let you get, get to know me

Do you wanna?  
Do you wanna?  
Do you wanna?  
Do you wanna?

Do you wanna?  
Do you wanna?  
We could turn it on

Just sweat  
All my fears away  
Dancing through the dark  
Saw your angel face  
Caught my shooting star  
I got you now, I'm Scorpio  
It's physical, it's natural  
My spiritual, my animal  
Caught my shooting star

I got you now, I'm Scorpio  
It's physical, it's natural  
My spiritual, my animal  
Caught my shooting star

Somebody told me that the night's done  
If I play the right song we could keep the lights on baby  
(Caught my shooting star)  
Somebody told me there's a full moon  
And if I play the right tune  
Would you give me all you  
(Caught my shooting star)
