

Cathy Dennis, Touch Me (All Night Long)

We're starting it over, we're making way for destiny
A time to turn over, a better life for you and me
A new recreation, to channel all this energy, hmmm
Let's solve the equation, I need to keep you close to me
So baby let your conscience go,
There's no turning back when love takes hold
Hold me baby, drive me crazy
Touch me all night long
Make me love you, kiss and hug you
Touch me all night long
The more that I see you
The more I know that love belongs
With you in my mind boy
I wouldn't know what's right from wrong
Cos live will take over
And leave you out of sight and mind
You've got to go with the feeling
And trust fate to be kind
And baby let your conscience go
There's no turning back when love takes hold
Hold me baby, drive me crazy
Touch me all night long
Make me love you, kiss and hug you
Touch me all night long
Hold me baby, drive me crazy
Touch me all night long
Make me love you, kiss and hug you
Touch me all night long
And baby let your conscience go
There's no turning back when love takes hold
Hold me baby, drive me crazy
Touch me all night long
Make me love you, kiss and hug you
Touch me all night long
Repeat to fade
