

# Cathy Dennis, West End Pad

No one can do all the things you do  
And stimulate the G-rays  
No one can do all the things you do  
And leave me in the same way  
No one can do all the things you do  
And elevate my pulse rate  
I've tried a west end pad and a classic car  
My favourite drink in my favourite bar  
A few close friends and a movie star  
But they still leave me wanting you again  
No one can do all the things you do  
And hit me in the right place  
No one can do all the things you do  
And leave me in the same way  
I've tried a west end pad and a classic car  
My favourite drink in my favourite bar  
A few close friends and a movie star  
But they still leave me wanting you again  
And every single time  
I ask myself why it never feels the same  
And every single time  
I have quizzed my mind till I nearly racked my brain  
But I think still  
It's amazing  
I've tried a west end pad and a classic car  
My favourite drink in my favourite bar  
A few close friends and a movie star  
But they still leave me wanting you again  
I've tried a west end pad and a classic car  
My favourite drink in my favourite bar  
A few close friends and a movie star  
But they still leave me wanting you again  
I've tried a west end pad and a classic car  
My favourite drink in my favourite bar  
A few close friends and a movie star  
But they still leave me wanting you again
