

# Cattle Decapitation, The Ripe Beneath The Rind

Flesh shall flay  
Peeled back -- exposing the nutrients of contents of mammal  
Nutritious, delicious fruit  
The stratified-squamous: keratinized  
Epithelia dissected  
Pseudo-stratified columnar, uni-cellular goblets (cells) secreting mucus  
Gored out  
The flesh is ripened - ready to gorge  
Visceral contents empty on the floor  
Like a fine wine the organs disgorge  
Victim lies begging but I'm wanting more  
The pain is insane, a new anus is torn  
Gaping slice  
Opened wide, peeling rind -- bleeding, spurting everywhere...  
(now revealing the salty goodness beneath and flash frying it)  
Lancing meat  
Tender outside -- juicy inside - disgusts me...  
Chopping, dicing, scrutinizing, dissecting and separating  
A corpse is still a corpse, of course we dine with no remorse  
We've sharpened all the knives to know the ripe that's beneath the rind  
A blood lust curiosity, what makes these humans tick?  
I've known it all my life...

## BLOOD

Flesh shall flay  
Peeled back -- now exposing the nutrients of contents of mammal  
Nutritious, delicious fruit  
The stratified-squamous: keratinized  
Epithelia dissected  
Pseudo-stratified columnar, uni-cellular goblets (cells) secreting mucus  
Gored out  
And like a wild boar your head is hunted  
And like a cantelope your head is opened  
And like a pork belly your skin seared sterile  
And underneath it lie the lies, the murder, the man, the meat
