

Celeste Buckingham, Run Run Run

All is fair in love and war
but all I do is love you more
our love is crazy, unhealthy
but I can't keep from you baby

So you said, why even bother
Set this love set me on fire
how I wish
you'd be the victim
so you'd see
just how i'm feelin

You better know know know
that I have conditions
I make the rules
and make the decisions
and I I I want nothing less than
what I deserve

So you better run run run
before I decide that
you are mine, two stars will collide
You better run run run
nowhere to run but to me
Ohh

Somehow I don't get the picture
don't know why you are the winner
our love is not what we wanted
but baby you finish
just what you started

So you said, why even bother
Set this love set me on fire
how I wish
you'd know we better
so you'd see
I'm not try tellin

You better know know know
that I have conditions
I make the rules
and make the decisions
and I I I want nothing less than
what I deserve

So you better run run run
before I decide that
you are mine two stars will collide
You better run run run
nowhere to run but to me□
Ohh

You are the cause of all this pain
and you are the reason I'm upset
you are the cause of
all this pain but you
are the cause of all this love
you are the thing I can't forget

To know know know
that I have conditions
I make the rules
and make the decisions

and I I I want nothing less than
what I deserve

So you better run run run
before I decide that
you are mine, two stars will collide
You better run run run
nowhere to run but to me
Ohh

You better know know know
that I have conditions
I make the rules
and make the decisions
and I I I want nothing less than
what I deserve

So you better run run run
before I decide that
you are mine, two stars will collide
You better run run run
nowhere to run but to me
Ohh

You better know know know
that I have conditions
I make the rules
and make the decisions
and I I I want nothing less than
what I deserve

So you better run run run
before I decide that
you are mine, two stars will collide
You better run run run
nowhere to run but to me
Ohh
