

Celia, Silence

Silence was the first thing that brought us
And then it just caught us, and caught us
And caught us inside
Silence was the first thing that brought us
And then it just caught us, and caught us
And caught us inside
I deeply was falling in silence
I'm thinking what I have deep inside my heart
I have you and you are all around
I deeply was falling in silence
I'm thinking what I have deep inside my heart
I have you and you are all around
Silence was the first thing that brought us
And then it just caught us, and caught us
And caught us inside
Silence was the first thing that brought us
And then it just caught us, and caught us
And caught us inside
Remember my trying in silence
To kiss you I send you deep inside my soul
In my soul quickly then in my heart
Remember my trying in silence
To kiss you I send you deep inside my soul
In my soul quickly then in my heart
(Just you baby
Deep in my heart
And you are all around)
Silence x3
And then it just caught us, and caught us
And caught us inside
