

# Cephalic Carnage, Enviovore

On a distant planet  
A place devoid of life  
Before that un fateful day  
Enviovore arrived  
On that distant planet  
Revolving around the sun  
Little did it know  
Here demise was sure to come<<  
Landing in the ocean  
Inseminates its seas  
Procreating organisms  
The water comes alive  
Spreading like cancer  
The planet thrived  
Evolving constantly  
Breeding amphibian's life  
As water dries up  
Legs develop  
Lungs adapt to air  
Now fast forward  
To the future  
Millions of years ahead  
Enviovore grows, regurgitates  
Assumes human shape, overpopulates  
Polluting land, water & sky  
The give of death is swat they prayed  
Hiding from the sun's violet rays  
Floating to the sky  
As they leave this place  
Enviovore grows  
Seeds the human race  
Infest the earth  
Bring forth extinction  
Proof of life proves fatal
