

Charli XCX, Miss U

i love you
it's obvious, but people can change
we got bruised
we left things undecided
and now we're two people
we're standing in the city rain
bur we're brand now
we turn our backs and walk away

even though we're through
I'm always here for you
I know you feel it too
I am telling you the truth

some nights, I go back there
right back where we used to love
think I messed up somewhere
don't know what I keep running from
don't know what I keep running from
don't know why I keep running
don't know why I keep running

so far
I am on the other side of the globe
whit new friends
with someone else asleep in the sheets
but I got you
locked up in a part of my brain
Forever
I can't forget my memories

even though we're through
I'm always here for you
I know you feel it too
I am telling you the truth

some nights, I go back there
right back where we used to love
think I messed up somewhere
don't know what I keep running from
don't know what I keep running from
don't know why I keep running
don't know why I keep running

sometimes I miss you when I'm all alone
and even though we both moved on
sometimes I play your favorite song
I play it on and on
and I miss you when I am all alone
and even though we both moved on
sometimes I play your favorite song
I play it on and on

don't know what I keep running from
don't know what I keep running from
don't know why I keep running
don't know why I keep running
don't know what I keep running from
don't know what I keep running from
don't know why I keep running
don't know why I keep running
