

Charlie Louvin, Scared Of The Blues

Let me go with you don't leave me I'll miss you I'll love you
Now that I've kissed you I'll never forget you I know it's true
If I can only tag along I'll do it to be with you
Don't make my heart believe it's long tell me you want me too
Let me go with you don't leave me I'll miss you I'm scared of the blues
Scared of the blues
[ac.guitar - organ]
Let me go with you and I'll never let you get lonesome
Let me be near you and my love is yours when you need someone
If only to be your old standby having to share your kiss
I'd rather be than left to die craving the love I'd miss
Let me go with you don't leave me I'll miss you I'm scared of the blues
Scared of the blues
