

Charlie Winston, Truth

You took a step into my world
Leaving all of yours behind, oh
We didn't know what would unfold
Just the feeling of a good thing so we leapt into the unknown

Took your time to understand
All the ways I wear my love, love
With a shield in your hand
There were sticks and stones
But no one broke their bones
The bond is bigger with each day we live

I believe in truth
Took a long time to get there
But we made it
I made it with you

Well, we had some ups and downs
But it never stopped the flow
Even days I played the clown
You believed in me enough to let me be
And think about the man I want to be

I believe in truth
Took a long time to get there
But we made it
I made it with you

I'm not gonna lie
Well, it took some time to let it go
What I left behind
That means nothing now I've got the flo(w)

I believe in truth
Took a long time to get there
But we made it
I made it with you
