

# Charlotte Martin, Up All Night

It's 3 AM and I have been in my head for quite some time  
Every fear, every tear has been swirling in my mind  
And there are still a hundred reasons I shouldn't walk away  
Do I love you if I leave you? You have no name

I was up all night  
Waiting for some kind of miracle  
I was up all night  
Feeling all alone in the universe  
I was up all night

When morning comes, I will tell you it's life I have to chase  
But every song that I sing will be written by your face  
And if you're really meant to be then you'll be back again  
And I watch as your beginning turns into the end

I was up all night  
Waiting for some kind of miracle  
I was up all night  
Feeling all alone in the universe  
If it's you or if it's me I save  
I'm still throwing it all away  
I was up all night

With a kick inside in the dark you hide  
And we both know how the end will be  
In your little tide with your eyes shut wide  
And we both know how the end will be  
How it will be

I was up all night  
Waiting for some kind of miracle  
I was up all night  
Feeling all alone in the universe  
If it's you or if it's me I save  
I'm still throwing it all away  
I was up all night
