

Cher, Paradise Is Here

You say you want to live some
Move out into the fast lane
You say you need excitement
To make you come alive

Some place a million miles from
The shadows that surround you
I look for your attention
You're lost out in the future

Where lovers ask no questions
And shadows never fall
Some pilgrim bound for paradise
No compromise
Paradise is here

[Chorus:]
It's time to stop your crying
The future is this moment
And not some place out there
Tonight I need your love
Don't talk about tomorrow
Right now I need your loving
Right now give it to me
Right now I want your loving
Right now- now, now, now

You talk about your new plans
To move up on the stairway
Your dream about the high life
That's waiting for you there

A world of fame and fortune
That's just around the corner
But I don't need no high life
To make me feel a real man
And I don't need to reach for
No castles in the sky
Just put your arms around me
Devour me
'Cos paradise is here

[Chorus]

Tonight I need Your loving
Paradise is here
