

# Cher, Paradise Is Here

You say you want to live some  
Move out into the fast lane  
You say you need excitement  
To make you come alive

Some place a million miles from  
The shadows that surround you  
I look for your attention  
You're lost out in the future

Where lovers ask no questions  
And shadows never fall  
Some pilgrim bound for paradise  
No compromise  
Paradise is here

[Chorus:]  
It's time to stop your crying  
The future is this moment  
And not some place out there  
Tonight I need your love  
Don't talk about tomorrow  
Right now I need your loving  
Right now give it to me  
Right now I want your loving  
Right now- now, now, now

You talk about your new plans  
To move up on the stairway  
Your dream about the high life  
That's waiting for you there

A world of fame and fortune  
That's just around the corner  
But I don't need no high life  
To make me feel a real man  
And I don't need to reach for  
No castles in the sky  
Just put your arms around me  
Devour me  
'Cos paradise is here

[Chorus]

Tonight I need Your loving  
Paradise is here
