Cher, The Island (With Greg Allman)

THE ISLAND WITH GREG ALLMAN

I think we need an island Cause we can't get along In this place that we're on And honey When I wake in the morning If I could see your face If I could see your face

[Chorus:] And I've covered the whole world Searching for a way to get to you Will it be this way forever Ooh, I feel the night is breathing Closer than ever And I can't believe we're no together

I need to get some answers Cause I can't understand it We both know it's wrong And honey I wanna die completely We've dragging it out too long Much too long

[Chorus]

And I've covered the whole world Searching for a way to get to you And I can't believe we're not together

I think we need an island
