'Till A Better Memory Comes Along

See the lines in my face, thereos one for everyday

love lived without you and held you only in my mind

See these hands, how they shake, how long it will take

Before I leave you in the past where you belong

One day I might forget, but right now lom not that strong

So loll hold on ntil a better memory comes along

If someone could really touch me

The way you used to do

If she could find one single feelino

That didnot start with me and you

Maybe then I might forget, but right now lom not that strong

So loll hold on ntil a better memory comes along

Maybe then I might forget, but right now lom not that strong

So loll hold on ntil a better memory comes along

lom holding on,ntil a better memory comes along
